## Consultation matters with the Seneca Nation (SNI)

On July 6, Cosmo Servidio, RA for Region 3, sent a letter to President Ricky Armstrong of the Seneca Nation to inform the Nation of a consultation opportunity on the State of Pennsylvania's proposed water quality standard changes under CWA 303(c). A second letter will be provided soon to the Nation on a consultation opportunity for the State of Pennsylvania's List of Impaired Waters under CWA 303(d). These matters may be of interest to the Nation because the headwaters of the Allegany River start in Pennsylvania and flow into New York State and directly thru the Seneca Nation's Allegany Territory near Salamanca before returning to Pennsylvania. Grant alerted Lisa Maybee, Environmental Director for SNI EPD, of these two letters and Lisa was very pleased to hear that Region 3 was reaching out to the Nation.
